### SPX-06/AZ&EL Antenna Rotator Unit Based on Slew Drive Gearbox

**Available Models:**

SPX-06/AZ&EL/HR = Positions sensors **HALL Effect** = **AZ&EL Rotor**  
 SPX-06/AZ&EL/ABS = Positions sensors **Absolute Encoders** = **AZ&EL Rotor**

**SPX-06/AZ&EL Rotor Unit**  
 (Standard configuration)

MD-01 or MD-02 controller  
 included standard delivery

- SPX-06/AZ&EL is a 2 engine X Y rotor system and supplied including:**
- ✓ SPX-06/AZ&EL rotor 0.1 degree resolution
  - ✓ Center pipe hole for object mount (max 51mm)
  - ✓ MD-01 or MD-02 rotor controller
  - ✓ Software to control MD-01 or MD-02 controller and rotor through PC
  - ✓ USB connection for PC (Remote control through Ethernet module optional)
  - ✓ Build in track interface included (EME, Satellite, or write own app, Protocol available)
  - ✓ All connectors to connect to rotor and SPID PS-0x power supply (Connector rotor side IP-68)

New model **SPX Slew Drive Antenna rotators** which are available with Hall Effect or Absolute Encoder positions sensors  
 Slew Drive systems can be used for communication companies, broadcasting centers, meteorological stations, research institutes, Universities educational establishments, VSAT, SNG, radio relay transmissions, etc etc.

All SPX Slew Drive systems do rotate 6 degree/sec. and 0.1 degree/step resolution

## SPX AZ&EL rotor Controlled by MD-01 / MD-02 controllers

SPID offers a new software setup in all supplied controllers to drive **NEW SPX Slew Drive AZ&EL rotators**  
Our **MD-01 or MD-02 controllers** are supplied incl this Firmware v2.0xxx.

### TECHNICAL DATA ROTOR SYSTEM SPX-06 AZ & EL

<b>AZ &amp;EL Rotor System: SPX-06/AZ&amp;EL/HR and SPX-06/AZ&amp;EL/ABS</b>	
Motor output speed	1.0rpm / 6 degree / sec
Motor voltage	28...30 Volts DC (6dgr/sec rotation speed)
Output torque	716 Nm / 528 lbf.ft
Tilting moment	1100 Nm / 811 lbf.ft

#### Freight charges:

We do ship daily worldwide, some countries excepted.

**Shipment of this kind of rotators is on pallet transport**, overseas freight can be expensive.

## Introduction SPX-06/AZ&EL and controller MD-01 / MD-02

The MD-0x controller is used to control the rotation of your rotor system. MD-0x is a multifunctional device and may be connected to the SPX-AZ&EL rotor system and display the angles direct in degrees on the front LCD display in 0.5.....0.1 degree resolution. (Absolute encoder can set to 0.05 dgr/step).

This system needs a Dual Voltage output Power supply, operation voltage of this system is 12-18Volts DC & 28-30Volts DC.

PS-01 or PS-02 Is a perfect solution to drive this rotor system, fits perfect to MD-01 or MD-02.

Setup is quite simple, most important the system is placed level in Horizontal as well in Vertical axe. Start-up manual will be supplied

Setup MD-02 and PS-02 picture below. (PS-02 is optional)

### Short summary MD-0x controller

Build in MD-0x rotor controller is a track interface which will be connected through USB (Win XP...Win 7, 8, 10, 11) USB Driver not needed, WIN OS support SPID products. New functions are available now and can be configured by the user through MD01dde.exe PC interface:

MD-0x (UI) Interface (Picture right) can be used to control the AZ & EL rotor by Personal Computer. You can install your favourite track program and control MD-0x through USB without the MD01dde PC interface as well. (PST rotor is most used)

### More available functions MD-01 / MD-02

- ✓ Most used and special function is the integrated function: Soft Start and Soft Stop ! Soft start and stop has available a 3 step Delay time and a 3 step acceleration time. Both Delay and acceleration can be set by the user step by step. This function is very helpful for large dishes
- ✓ Firmware update free of charge
- ✓ Short way function for Satellite track
- ✓ USB controlled
- ✓ Minimum and maximum angle free adjustable for Y and X Axe
- ✓ Write your own protocol and/or PC application (protocol available for download)
- ✓ Ethernet module option (optional unit)
- ✓ Current measure module option, actual current in Amp's of both motors (optional unit)
- ✓ Free of charge software update available at our High Resolution support page (need password to access)
- ✓ Lot of track software is supported: for example Orbitron (quit old) and PST rotor and much more.  
(Track software should support SPID or Rot2Prog protocol)

## Optional Power supply: SPID Power Supply Module, PS-01 & PS-02

Model: SPID PS-01

Model: SPID PS-02

This Module, PS-0X is a Dual Voltage PSU which should be connected to MD-0X High Resolution rotor system SPX-05/HR/XY or SPX-05/ABS/XY

Standard build in is a professional 150W/10A and a 500W/20A Power Supply unit.  
The Power supply units PS-01 / PS-02 do have the same dimensions as MD-01 / MD-02 Controllers.
